

# Kindergarten Learning Intentions

## Term 1, Week 8

### Religious Education

We are continuing to learn about Lent. This week we focused our discussions on how we can help each other and other people in need during the season of Lent.

### Mathematics

We have been investigating length this week. We are learning that length is a measure of how **long** or **short** something is from end to end. We are using language like **longer than** and **shorter than** to compare the lengths of objects in our classroom.

### English, History and Science

We are learning to work **cooperatively**. We are learning that this means we work in a small group **together**. We are developing appropriate speaking and listening skills to share and record all of our ideas in our History and Science lessons. We know that we need to take turns to speak and listen to our group.

### Good Sam Day & International Happiness Day is next Thursday.

Students can wear their *Sports Uniform* and a coloured accessory that makes them happy. All funds raised will go towards helping those affected by the bushfires.

**Remote Learning Packs** were sent home on Wednesday. We ask that students do not complete the tasks in the booklets until notified.

**Reading Eggs** and **Mathletics** login details can be found on each student's home reading log folder. Students can use these interactive and engaging learning tools to continue their learning at home.

**School Readers** We will continue to send school readers home for now. Please ensure your child washes their hands before and after reading the book.

**Mrs McLaren and Miss Pelling.**
